<b>DELIVERY</b> <i>Face-to-face, Distance learning, etc.</i>	Hybrid: Face to face and synchronous distance learning
<b>USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY</b> <i>Use of ICT in teaching, laboratory education, communication with students</i>	<b>Use of ICT in Teaching</b> During the educational process, various Web and Semantic Web modeling tools are used, along with the material available at the e-learning platform (mostly Powerpoint slides) The hybrid teaching method involves synchronous learning with the support of the videoconferencing tool Zoom. Students are taught a variety of tools related to the course content and material.
